MESSAGE *from* COUNTRY DIRECTOR

2009 was a year of changes for ADRA Indonesia; new staff, new management, new projects, new challenges, and all this contributed for positive learning and opportunities in our organization. ADRA Indonesia also was involved in responding to the major earthquakes that happen in Indonesia last year, funds from the ADRA Network and UN OCHA allowed us to bring aid to more than 7,000 families in West Java and West Sumatra together. New health projects in Papua and North Sulawesi were opened, as well as a new livelihood project in Aceh. The continuation of Microcredit projects in North Lampung and West Java having excellent results in the establishment of cooperatives and loan systems. New partnerships with donors were created as we are continually looking for opportunities to become better and more efficient in our efforts and commitment to the people of Indonesia.

We are inspired and motivated by the families, individuals, people we work with in the communities we are involved in; planning, organizing, creating opportunities but more importantly: learning, as together we form a team with all stakeholders in the locations where we have presence. In this report you will find relevant information about our work in Indonesia, we are very happy for what we have accomplished and are working hard to continue to become better as an agency and individuals.

We are especially grateful to all of our donors, partners and Board members, local and international, for their support to make our work possible. To all ADRA Indonesia staff that worked during 2009, I would also like to thank you for your service, commitment to our organization, but most importantly, your dedication alleviating the needs of the people in Indonesia and helping improve peoples' quality of life.

Sincerely yours,

**Hector Carpintero**

# MICRO CREDIT *for* FARMERS

Donor: ADRA International  
Fund: USD 100,000  
Timeframe: August 2008 - July 2010  
Location: North Lampung - Indonesia  
Beneficiaries: 307 petani  
Project Team: Yosephine Sherlie Bidi (Project Coordinator), Abdul Wahid (Field Officer), Evelin Ludji Leo Sarci (Administrative Assistant)

Mr Asman was in his field.

The Micro Credit for Farmers project in Waykanan, Lampung, Indonesia is funded by ADRA International for 2 years period (1 August 2008 to 30 July 2010).

The overall goal of the project is to reduce the vulnerability of 300 farmers in Waykanan district. Through field observation, so many land areas are abandoned by local farmers. They did not cultivate 100% of their fields.

ADRA has worked together with Srikandi II group (women solidarity group) from Neki village to open a vegetable farm in one of abandon farm area. The purpose was to convert it into a productive field and use it as a pilot project to encourage other group of farmer(s) to maximize their productivity by utilizing all available land area.

## story of MR. ASMAN

Since September 2009 he has been cultivating many vegetables such as: squash, long bean, chili and eggplant. From two times harvest he got total money of IDR 800,000. Before join with ADRA program, his family only depends on paddy and coffee field but he is happy now that he can earn some money from his vegetables field more quickly than from paddy or coffee field. He smiled and said, "Indeed, I do not need to buy vegetables at market for my family to eat. I just pick them all from our garden."

He admitted that ADRA have encouraged him to extend his business. Not only getting soft loan from ADRA program, he also can improve his skills and knowledge by attending a regular training. Mr. Asman thanked to ADRA that introduced him a way to earn other income besides selling paddy or coffee from his field.

## story of A TRADITIONAL HEALER

One traditional healer in Teminabuan, South Sorong, West Papua had some experience taking care one women who infected by HIV and AIDS. It happened two years ago, when one of her relatives introduced her to a woman who came from Sorong city. This woman had already been infected with opportunistic infections (candidacies, and TBC). But the traditional healer didn't know anything about opportunistic infections and their relationship to HIV/AIDS at that time.

Several months later the condition of that woman became worse, and the traditional healer took her to some hospital in Sorong city. The doctor in that hospital sent that woman to VCT (Voluntary, Counseling and Testing). And the result of the HIV testing were positive (reactive), meaning she had been infected with HIV. The woman ended up telling the traditional healer that she had HIV, and she was crying and ashamed. Only two weeks later, after she had told the traditional healer about her status, the woman died. After the women died, the traditional

healer wondered if she too was already infected with HIV from that woman, because she had been very close to her, sleeping together, eating from the same plate and using the same bath room. She keeps praying to God and hopes she is not infected.

Several months later she met one of ADRA SHIVAP project staff. And she had been participating in 4 days training about HIV and AIDS, STI and Reproductive Health.

Now, she has knowledge related to these issues, and she active spreading the information to general population in Teminabuan, South Sorong, West Papua.
