Project's Activity In June 2010

Micro Credit For Farmers - North Lampung (Donor: ADRA International)

SRI (System Rice Intenfication) Organic method Training.

In three days, June 1 – 3, 2010, ADRA has held training of rice planting which is called SRI method to the farmers in Neki village. The speaker was an experienced IPB alumni, Mr. Utju Suiatna. The participants of training was increasing day by day and they got more eagerly in doing rice planting. They got many and more practical knowledges which has been tested and tried by Mr. Utju Suiatna. Besides trained the teory of rice planting method, he was also encouraging all farmers to join "Go Green" program or preserving the environment by reducing or not using chemical fertilizers, process kitchen garbage, grasses, dry leaves into organic fertilizer and use it on their own crops. He emphasized on the Organic use which not

SRI rice cultivation practice.

only make fertile soils but minimize the cost of planting rice or vegetables as well because no longer need to buy chemical fertilizer and the most is make us grow in health by consuming organic food. The end of training, ADRA was asking Participant commitment to implement this method. There were about 28 farmers committed to do the method by

planting White, Red and Black Rice in which the seeds provided by ADRA. The objective of implementing rice cultivation SRI method is helping the farmers to get good the texture or quality of soil that results better production of rice which will has a better price in market and will prosper the farmer. *(by Yusi Bidi - Project Coordinator)*

Health And Nutrition Education Program – Sangihe (Donor: ADRA Australia)

Nutrient Post with Positive Deviance Inquiry (PDI) approach.

Last month, we have reported the activities and benefits of Posyandu (integrated health post), then now is the follow-up of Posyandu activities. After Kader (health worker) can perform well five steps activities in Posyandu, then they can also make reporting and analysis of results of Posyandu activities. One of the important of these activities is to know the number of children who have poor nutri-

tion or malnutrition are seen through the KMS (healthy card) owned by every child who came to the Posyandu. Last February 2010, Herman and Bruce have conducted analysis of child malnutrition (in Yellow line and under Red line), and this result has been shown to Puskesmas and PKK sub district in 22 villages or three sub project area. But for the month of March - May, most of Kader in the 22

villages have been able to create their own reports and have information the number of child under five who have a weight loss / malnutrition, and child under five should immediately raise back the weight / nutrition. This project has implemented Nutrient Post in four villages by using Positive Deviance Inquiry (PDI) approach. Not many NGO's doing this PDI approach.

Children in the nutrient post.

Activities in the nutrient post.

Because in this approach, the contribution from community and mothers of children who have poor nutrition is needed, this is what makes this activity a bit hard to accept, especially if we are explain it in a wrong way, this activity can be failed. But this is become a challenge for us and this is a enjoyable if we can make it. Below are the stages that must be done in starting the Nutrient Post with PDI approach: PDI Training for Kader Posyandu performed for 9-10 days. Conducting the training for 9-10 days for Kader and community leader is not easy work but it must be done. After we see the contents of the training so we share it, because the

first related with Posyandu that's conducted for 2 days and the second especially PDI conducted for 7 days. Within 7 days of PDI training, the things that are taught are: 1. Posyandu data review during the three months. 2. Focus Group Discussion (FGD) / Guided Discussions towards mothers groups, fathers groups, grandmothers groups and stalls. 3. Community Deliberation Village I. 4. PD family survey and non PD. 5. Community Deliberation Village II. 6. Implementation of KP3G (Behavior Practice Activity and Nutrient Recovery). The activities done in class and also in field practice. Finally Kader and community leaders returned to

their places to prepare for things that have been learned in training and finally KP3G implementation by making Nutrient Post in their village. To create Posyandu data review, Kader can do it by themselves and ADRA Health Officer (Herman and Bruce) only to assist to ensure that they are doing in correct way or not, so too in FGD activity and PD family survey and non PD. But the result is quite good in 3 villages that have been trained. It is somewhat complicated by Kader is at the time of Village Community Deliberation, other than they should do presentation of the findings about Posyandu activities, the number of children of poor

nutrient and result of findings survey, and this is never happened before in their duties as a Kader, they also must be able to convince the community leaders who were invited in the meeting, that in their village have a serious problem with the number of infants who have poor nutrition and should be handle immediately, because this will make present generation become a bad generation. And ADRA still need to accompany them in this area. After community leaders agreed with this issue, they were also asked to contribute and to encourage mothers of children to come to nutrient post and implement KP3G. *(by Jenny Zebedeus - Project Coordinator)*

Joakim Cotting (ADRA Switzerland) visiting Padang office

Joakim Cotting, ADRA Switzerland Finance & Program Director has a field visit on 3 to 7 June 2010 in Padang office to do monitoring and research on the progress of Semi Permanent Shelter Project funded by ADRA Switzerland and Swiss Solidarity. In these visit, Joakim survey Nagari Sungai Sariak and Nagari Balah Aie area, sub district VII Koto, Pariaman district, West Sumatra, and he was very happy that the aid provided by ADRA Switzerland and Swiss Solidarity were accepted by the beneficiaries those who really need it after going through data collection and selection process directly by ADRA Indonesia field team. During field visit, Joakim has

conducted several interviews with some beneficiaries especially to a family who is still living under the roof with walls had flattened. In addition to, conducted audit on financial systems, purchasing, etc, Joakim also has given additional knowledge for all staff according to their roles whether in management side as well as engineering side in building semi permanent shelter and even show on how to create good and strong foundation. And with Hector Carpintero, Country Director of ADRA Indonesia gave a motivational speech to the team to run this project as well as building a house for his own family. Project team are very happy with a visit from Joakim and Hector besides

Joakim and Hector with ADRA Team.

increasing knowledge, we also can feel brotherhood between us without looking at any position that we have. *(by Mario Pattinasarane - Project Coordinator)*

Semi Permanent Shelter Project - Padang Pariaman (Donor: ADRA Switzerland and Swiss Solidarity)

Story of Mrs Yunizar.

I am Mrs. Yunizar. I live in Kampung Panas sub-village in Pincuran Sunsang Village. Me and my husband work as farm labor to earn money around 400.000 rupiah per month. We raised 4 children, 3 daughters and 1 son. When the earthquake occurred, I was on the outside 300m of the house taken a bath. I saw a giant white cloud and huge loud sound during the earthquake in my village and until now I still wondering what that was. Luckily there were no casualties in my family, all of my children were playing outside the house and my husband was in the farm when earthquake stroked. After the earthquake we

lived in our relative house, but we thought that we can't just depend to the family to survive. So, me and my husband decide to go back to our destructed house at all cost. No one helping us since after the earthquake and we never receive any donation, because almost 100% donation not given direct to the beneficiaries. We are very happy since ADRA search the most needed family one by one and help us to overcome this misery. I really thank to this gift because this is what we need for now. *(by Mario Pattinasarane - Project Coordinator)*

Mrs Yunizar with her two daughters in their house after the earthquake.

*Sorong Selatan HIV And AIDS Prevention Program (SHIVAP)
(Donor: ADRA Australia, ICCO & Kirk en Actie)*

Mr Yudhi as Health Officer of SHIVAP Project was answering question from the listener.

Radio Program

SHIVAP Project had made a contract of agreement between ADRA Indonesia through and RRI (Radio Republik Indonesia - Radio of the Indonesian Republic) Program One. In such consent SHIVAP Project will conduct a radio broadcast for 10 times during the second project, once a month on Monday, the first week of each month at prime time 8.00pm - 9.00pm. SHIVAP Health Project Officer

will be the keynote speaker and will provide national radio station announcer who has been trained specifically on HIV and AIDS and also RRI will conduct promotions on ADRA radio talk show program. Premiere broadcast was held on April 5, 2010 with the basic topic of HIV and AIDS information, although the event was delayed because the power was off but this event still attractive, the MC should stop considering the air time was end. In this premiere broadcast the total response of sms was 30 and 10 calls. Few callers were disconnected because of network problems. Below is the sample of text that came in during the radio

program takes place:

- What are the symptoms of HIV? and the sender sms proposed that ADRA held seminars for HIV and AIDS in Sorong area – Male
- The follow-up for patients with HIV positive? – Male
- Is it possible that people infected with HIV to be quarantined, so would not infected other people? – Male
- Where is the area of ADRA works? Its also suggested that ADRA working area should be opened in Sorong – Female
- Is HIV can be transmitted through kissing lips? – Female

Practice how to use condom with the right and save way, one of the session in counsellor class.

Practice in patient blood sample to test in laboratory equipment.

*Tools For Women Empowerment OISCA Training Center - Sukabumi
(Donor: ADRA International)*

On last 23 June 2010, ADRA International with gift catalog program through ADRA Indonesia has donated new tools for women empowerment OISCA (Organization for Industrial, Spiritual, and Cultural Advancement) training center in Sukabumi. These new tools are planned to replace the old tools that already obsolete and can not be used anymore. The tools will support and assist women empowerment program in that area. Gifts distributed: Automatic Gas Oven, Proofer, Mixer 20L, Cooling Rack, Stove, Rice Cooker, Stainless Steel Shelf, Screen Installation of Food

Processing Room, Blender, Automatic Sewing Machine, Manual Sewing Machine, Hemming Machine, and Electric Iron. The process of handing over tools are going well and smoothly, was greeted enthusiasm by management, staff, trainers and training participants. The tools have motivated them to learn and practice more to become women who can support the family economy and beneficial to society wherever they are. *(by Ralfie Maringka - Project Coordinator)*

The truck just arrived in Sukabumi and ADRA Team immediately unloaded the aid.

Hector Carpintero (Country Director - ADRA Indonesia) handed over one unit of blender symbolically to one of the training participants.

One unit mixer to support small business in OISCA training center.

ADRA Team, WIUM Envoy, OISCA Team and training participants photographed together after handed over ceremony finished.

Meet Our Staff

Resna Syahkarliana

Field Officer in Pangandaran
Birthday: 14 August
Email: resna_syahkarliana@adraindonesia.org

What make you interested working in the field? I am very grateful dan happy that I can work with ADRA. I got many new experience and new knowledge from the job as Field Officer. Helping community on the field, make them smile and helping them to make positive change, thats all happiness and satisfaction in my life. Thanks to ADRA for giving me opportunities to get knowledge and worthy experiences.

Abdul Wahid

Field Officer in Lampung
Birthday: 22 March
Email: wahid_abdul@adraindonesia.org

What is your favorite ADRA moments? I am thankful to ADRA for giving me opportunity to join SED Lampung Project. Each day, I gain new knowledge and experience from ADRA, External trainers and farmer as well which not only enrich my knowledge but also equipt me to assist the Farmer in the field to execute all SED Lampung Project's program.

Birthday In This Month

Happy birthday to you...

Lukman Hakim
Support Staf in Jakarta
Birthday: 17 June

Many happy returns and wish you all the best...

ADRA
ADVENTIST DEVELOPMENT
AND RELIEF AGENCY
INDONESIA

*Changing Indonesia
One Life At A Time*

The Adventist Development and Relief Agency (ADRA) is an independent humanitarian agency established by the Seventh-day Adventist Church for the specific purpose of providing individual and community development and disaster relief. Locally registered, ADRA serves people without regard to their religious association. It simply helps people in need, especially those most vulnerable such as women, children and the elderly.
